XP Core Values

- **Communication**: Everyone on a team works jointly at every stage of the project. We have clear communication between us by conducting meetings regularly on Zoom, Slack and WhatsApp. We make sure every body has a clear understanding of what is being done for every user story.

- **Simplicity**: We strive to write simple code bringing more value to a product, as it saves time and effort. We brainstorm and come up with simpler solutions to make the code readable and simple to anyone. We are focused on the necessary components that are required for a successful Hotel Management System.

- **Feedback**: We constantly get feedback on the work that is being done as it provides a space for improvement by taking the positives of every feedback and improving the product accordingly.
